### Fund News

#### Results & News:

**Adobe** and **Tencent** both reported 26% YoY revenue growth for the last quarter. Adobe also increased full year revenue growth guidance to ~20% from ~18% previously.

**Microsoft** announced a \$22bn contract with the US Army for the supply of 120k augmented reality headsets leveraging on its HoloLens technology and Azure cloud platform. The Supreme Court ruled in favour of Google in their decade long copyright infringement case with Oracle, avoiding what was potentially a multi-billion dollar liability for parent company **Alphabet**.

#### Key Portfolio Changes:

There were no material portfolio changes this month.

### Market Update

The tug-of-war between increased bond yields and earnings growth continued with the Nasdaq Composite returning 1.5% against the Fund's more sober 0.6%. After the month end, the first signs of a thawing in the Growth Devaluation Phase occurred when a number of IB's started to suggest that the Cyclical Rally could have played out and it was time to switch into Quality "Growth at a Reasonable Price" names which saw the likes of GOOG and FB rally. We would guess that this call for the turning of the tide could be too early but it is a positive signal nonetheless. In the meantime, economic conditions appear to be improving for many countries whilst financial conditions remain loose hence, when combined with reduced valuations for our portfolio names, we retain our **Bold** portfolio stance.

### Top 20 Equity & Bond Net\* Exposures as a percentage of Net Assets

### Key Risk Considerations - Capital At Risk

This material is not a solicitation or an offer to invest with Manchester and London Investment Trust plc ("MNL" or the "Fund"). MLCM has not taken any steps to verify the adequacy, accuracy or completeness of any information.

MLCM, MNL nor any of their respective affiliates, officers, directors, agents and employees make any warranty, expressed or implied, of any kind whatsoever, and none of these parties shall be liable for any losses, damages, costs or expenses, of every kind and description, relating to the adequacy, accuracy or completeness of any information in this document or the use of this information. As with all historical performance data, it may not be used to predict future characteristics or performance relied on in making any investment decisions.

Share market conditions are affected by many factors such as: general economic outlook, movement in or outlook on interest rates and inflation rates, currency fluctuations, commodity prices, changes in investor sentiment towards particular market sectors and the demand and supply for capital. As a result, the price of the Ordinary Shares could be highly volatile and can go up or down. Past performance should not be seen as an indication of future performance.

The value of investments can go down as well as up and investors may not get back the amount originally invested.

Holdings in overseas investments are subject to changes in currency exchange rates, which may cause the value of such investments to go down as well as up.

Gearing, sometimes referred to as leverage, can be used by the Fund to borrow to gain additional exposure to investments. Gearing works by magnifying the performance, this can result in either greater losses or profit had the Fund not used Gearing.

Derivatives can be utilised by the Fund, these instruments also give rise to leverage without the need to borrow. Derivatives may in addition also give rise to counterparty risk, the risk the issuer of the derivative cannot fulfil its obligations (profit that maybe due to the Fund).

For a full list of risks and definitions of the portfolio risk statistics provided please refer to the Investment Disclosure Document and KID at [www.mlcapman.com](http://www.mlcapman.com).

### Past performance is not a reliable indicator of current or future results.

### Notes for Risk Management & Valuation Metrics:

<sup>1</sup>Source: Bloomberg L.P. (inc PORT) as at 30 March 2021. <sup>2</sup>As defined by the Alternative Investment Fund Managers Directive (as implemented in the UK on 22 July 2013), calculated using data from Bloomberg PORT and Link. <sup>3</sup>Portfolio and Benchmark volatility are calculated using the Bloomberg Risk Model on underlying security returns, annualised, in base currency (GBP). <sup>4</sup>Sharpe is calculated by Bloomberg L.P. from underlying security returns in base currency (GBP). <sup>5</sup>Forward 12m. <sup>6</sup>Historic weekly Correlation over 5yrs in GBP using MNL share price. Nasdaq = Nasdaq Composite Index.

### Comparative Period NAV TR Performance (Source: Bloomberg L.P., Link, MSCI)

This comparison is illustrative only. All return figures are sourced from Bloomberg L.P. NAV return is on a total return basis (dividends reinvested), net of all costs incurred. Fund NAV is calculated weekly by Link Alternative Fund Administrators Ltd ("Link"). Calculation time periods depend on the timing of
