¹ Calculated by Link Alternative Fund Administrators Ltd ("Link") as at 31 January 2023.

² Source Bloomberg L.P. (inc PORT) as at 31 January 2023.

³ Calculated by Link Alternative Fund Administrators Ltd, as a percentage of average net assets and using expenses, excluding interest costs for the year ended 31 July 2022. Based on the Association of Investment Companies (AIC) methodology for calculating the Ongoing Charge figure. Figure excludes the variable element of the management fee (which may be either positive or negative).

⁴ Sustainalytics Environment Percentile.

⁵ Based on the last 2 semi annual dividends paid by the Fund divided by the MNL share last price as at 31 January 2023.

⁶ Excluding shares held in treasury.

Before making an investment you should ensure that you have read and understood Manchester and London Investment Trust plc's latest Annual Report, KID and Investor Disclosure Document in detail, which can be found on the following website: www.mlcapman.com.

Please ensure you read the Key Risk Considerations section overleaf.

This material is not a solicitation or an offer to invest with Manchester and London Investment Trust plc ("MNL" or the "Fund") or any other security.

Share market conditions are affected by many factors such as: general economic outlook, movement in or outlook on interest rates and inflation rates, currency fluctuations, commodity prices, changes in investor sentiment towards particular market sectors and the demand and supply for capital. As a result, the price of the Ordinary Shares could be highly volatile and can go up or down. **Past performance should not be seen as an indication of future performance.**

The value of investments can go down as well as up and investors may not get back the amount originally invested.

Fund News

Microsoft reported revenue growth of 2 per cent (7 per cent excluding FX) with strong growth in Cloud offset by weakness in Personal Computing. Management guided to a sequential slow-down in Azure growth throughout 2023 as clients optimise their cloud spend. However, we view this as a temporary "optimisation" period within an ongoing secular growth story. Cloud still constitutes only ~1/5 of the IT market and hence we see a long runway for the migration of on-prem workloads to the cloud.

The success of Chat GPT and Microsoft's inclusion of AI within Bing has driven increased market interest in generative AI and the chips that facilitate it (Nvidia and AMD). Alphabet's subsequent AI livestream did not convince the market that it is taking the threat to its monopoly in search seriously enough. Whilst this new focus on generative AI may be edging into hype, the seeming lethargy of Alphabet is concerning, validating our decision to materially reduce the holding in 2022.

Other holdings reported quarterly Revenue growth rates as follows: **Gen Digital** 33 per cent, **ASML** 29 per cent, **Oracle** 18 per cent, **AMD** 16 per cent, **Sage** 10 per cent, **NXP Semi** 9 per cent, **Amazon** 9 per cent, **Amdocs** 7 per cent, **Intuitive Surgical** 7 per cent, **Alphabet** 1 per cent and **Apple** minus 5 per cent.

Market Update

After a Bad month in December, we had a great month in January which put our NAV per Share above the NAV per Share reported in the November factsheet. We generated an outperformance over our benchmark and the Nasdaq Composite (in GBP terms). The 5 best attributions came from ASML, NVDA, CDNS, AMD and SNPS which are all the stocks we bought when we shifted out of Chinese stocks and out of Soft Technology stocks. Since the month-end, we have also seen MSFT perform on increasing interest in AI related stocks. Cockroach Growth Investing is working, for now.

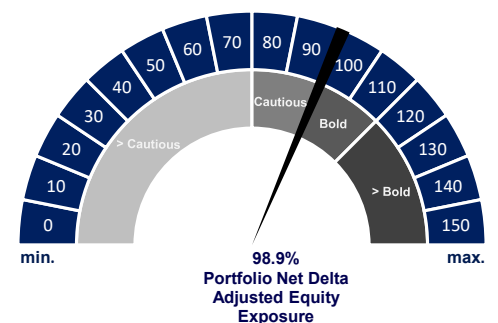

As we write, the Market's key worry has grown from a couple of prints of inflation and wage data that suggest disinflation will be harder to achieve from here. The Market is becoming concerned that we may be stuck on a higher plateau of inflation than desired which should temper the recent buoyancy in markets. Nonetheless, it is encouraging for us that Investors are clearly cognisant of and excited by the huge opportunities ahead that AI potentially offers.

Top 20 Equity & Bond Net* Exposures as a percentage of Net Assets

<u>Holding:</u>	<u>Net:*</u>	<u>Net Equity Exposure Breakdown:</u>	<u>Net:*</u>

Key Risk Considerations - Capital At Risk

MLCM has not taken any steps to verify the adequacy, accuracy or completeness of any information.

MLCM, MNL nor any of their respective affiliates, officers, directors, agents and employees make any warranty, expressed or implied, of any kind whatsoever, and none of these parties shall be liable for any losses, damages, costs or expenses, of every kind and description, relating to the adequacy, accuracy or completeness of any information in this document or the use of this information. As with all historical performance data, it may not be used to predict future characteristics or performance relied on in making any investment decisions.

The value of investments can go down as well as up and investors may not get back the amount originally invested.

Holdings in overseas investments are subject to changes in currency exchange rates, which may cause the value of such investments to go down as well as up.

Gearing, sometimes referred to as leverage, can be used by the Fund to borrow to gain additional exposure to investments. Gearing works by magnifying the performance, this can result in either greater losses or profit had the Fund not used Gearing.

Derivatives can be utilised by the Fund, these instruments also give rise to leverage without the need to borrow. Derivatives may in addition also give rise to counterparty risk, the risk the issuer of the derivative cannot fulfil its obligations (profit that maybe due to the Fund).

For a full list of risks and definitions of the portfolio risk statistics provided please refer to the Investment Disclosure Document and KID at www.mlcapman.com.

Past performance is not a reliable indicator of current or future results.

Notes for Risk Management & Valuation Metrics:

¹Source: Bloomberg L.P. (inc PORT) as at 31 January 2023.

²As defined by the Alternative Investment Fund Managers Directive (as implemented in the UK on 22 July 2013), calculated using data from Bloomberg PORT and Link.

³Portfolio and Benchmark volatility are calculated using the Bloomberg Risk Model on underlying security returns, annualised, in base currency (GBP).

⁴Forward 12m.

⁵Historic weekly Correlation over 5yrs in GBP using MNL share price. Nasdaq = Nasdaq Composite Index.

⁶Estimated weighted average sales exposure to China & Taiwan. Where sales exposure to these countries has not been disclosed by our holdings, broker estimated ranges or other subjective measures have had to be used instead. Therefore, there is a high degree of subjectivity within this figure and it should only be viewed as a rough guide.

Comparative Period NAV TR Performance (Source: Bloomberg L.P., Link, MSCI)

Data as at 31 January 2023. This comparison is illustrative only. Return figures are sourced from Bloomberg L.P. NAV return is on a total return basis (dividends reinvested), net of all costs incurred. Fund NAV is calculated weekly by Link Alternative Fund Administrators Ltd ("Link"). Calculation time periods depend on the timing of NAV releases and so may differ slightly to the axis labels. The figures shown relate to past performance. FYTD is from the end of July 2022. MLCM Inception time period is performance since 22/09/2015. *MSCI UK IMI Index (GBP).
